

# From the President

MC&MCA members use concrete and masonry to build environmentally and structurally sound buildings that are less expensive to operate and maintain. Buildings that last the test of time are made with concrete and masonry!

The buildings shown here have been selected for this year's Excellence in Concrete and Masonry Design & Construction Awards. The MC&MCA thanks architects, designers and engineers that consistently promote the use of concrete and masonry. We also wish to thank our contractors, suppliers and our employees that build with quality and pride in mind.

The MC&MCA has been in business since 1964 and still is home

to the best commercial builders in the country. We look forward to many more years of partnering with the design community, the materials and service providers and the workers that do the work.

If you would like to learn more about the MC&MCA contact Executive Director, Gary Botzek at 26 East Exchange Street, Suite 414, Saint Paul, MN 55101, or call him at 651-293-0892. Be sure to visit our newly designed website at [www.mcmca.com](http://www.mcmca.com).

Sincerely,

Frank P. Grazzini  
President
